DIGITAL  
TECHNOLOGY

"Di" series utilizing HONDEX's latest digital technology.

Introducing new technology of direct digital conversion. The optimized filtering even for weak signal is now available. "Deeper detection for deep water" and "Higher resolution image for shallow water" are in your hands.

"Di" Features

- Dual display for same frequency:** Different gain settings are possible for single frequency image by splitting the image of single frequency to two different screens.
- Whole Display Gain Adjustment:** Gain adjustment reflects to whole the past image (all display presentation).
- Variable Frequency:** Applicable for variety of transducers.
